EDUCATION

Johns Hopkins University

B.S./M.S.E., Biomedical Engineering

Minors: Applied Mathematics & Statistics, Computer Science, Entrepreneurship & Management

Honors: Dean's List, Alpha Eta Mu Beta National Biomedical Engineering Honor Society

Professional Societies: Biomedical Engineering Society (BMES)

Baltimore, MD

May 2026

GPA: 3.9 / 4.0

WORK EXPERIENCE

Decision Analytics Associate Intern

ZS Associates

San Diego, CA

June 2025 - August 2025

- Built a pipeline prioritization framework for a pharmaceutical client using conjoint modeling, market sizing, and competitive analysis to compare device profiles; identified potential 25% modeled market share upside over five years.
- Conducted diligence-style analysis across multiple analog products (~70% feature overlap), synthesizing market trends, competitive dynamics, and product feature tradeoffs to assess revenue potential and execution risk.
- Developed Excel-based forecasting and scenario models using patient claims data, translating analyses into clear recommendations to support adoption planning and downstream operational decisions.

Business Operations Intern

LKN Engineering and Testing

Boston, MA

June 2024 - August 2024

- Led financial analysis to support operational decision-making by building dashboards consolidating three years of revenue, cost, and project data, enabling margin analysis, forecasting, and resourcing decisions.
- Identified key cost drivers across vendors and project types, informing budget recommendations that contributed to a 10% cost reduction on a large-scale solar infrastructure project.
- Supported proposal development and client outreach in collaboration with senior leadership, securing 2 new contracts and maintaining relationships with 5+ active clients.

LEADERSHIP EXPERIENCE

President

Alpha Kappa Psi (Rho Psi Chapter)

Baltimore, MD

November 2024 - November 2025

- Oversaw operations and strategic direction for an 80+ member co-ed professional business fraternity chapter, managing an 8-member executive board to drive organizational growth and member development.
- Designed and launched large-scale professional programs, including a campus-wide Investment Challenge for 100+ participants and an alumni mentorship network that supported 100% internship and full-time placement.

Managing Partner

Cobalt Consulting Group

Baltimore, MD

November 2022 - Present

- Directed a 30-person life sciences consulting organization, delivering market analysis, financial modeling, and commercialization strategy for biotech and healthcare clients, including work for a \$1.2B company.
- Owned execution across multiple concurrent engagements by managing analyses, timelines, and team resourcing, translating ambiguous client questions into clear strategic and operational outputs.

Design Team Leader

Center for Bioengineering Innovation & Design

Baltimore, MD

January 2024 - Present

- Led an 8-person cross-functional team from initial problem definition through delivery, aligning stakeholders on scope, milestones, and execution priorities for an autonomous robotics system.
- Conducted 15+ stakeholder interviews, synthesizing qualitative insights into clear success metrics and execution priorities, enabling delivery of a validated solution within six months with >90% task accuracy.

SKILLS & INTERESTS

Technical Skills: Python, Java, C, C++, R, SQL, MATLAB, Excel, PowerPoint, Tableau, Power BI, Figma

Business & Analytical Skills: Market Research, Financial Modeling, Commercialization Strategy, Competitive Analysis, Agile/Lean

Languages: English (native), Marathi (proficient), Spanish (conversational)

Interests: Gymnastics, Taekwondo, Skiing, Snowboarding, Cooking, Travel Planning, Scientific Writing, Robotics
